Summary

Software engineering graduate specializing in data science, with proficiency in Python. Quick to learn new technologies and adapt to different data tools. I enjoy working in teams, where I can help turn complex data into clear insights. Currently seeking a full-time role to apply my data science skills, contribute to a team, and continue my professional growth.

Education

2019-2023: B.Sc. in Software Engineering (Data Science major) at SCE Shamoon College of Engineering.

Skills

Python, SQL, JavaScript, React, Node, Linux, Machine Learning, Deep Learning, SQL/NoSQL Databases, CI/CD, Web Scraping, Agile Methodology, Git.

Project Experience

- **Business Web Application:** Developed a React web application incorporating an AI tool to enhance business functionality. Leveraged Google Cloud Platform services for various aspects of the project and implemented a CI/CD pipeline to ensure efficient updates and maintenance.
- **Global Cost of Living Analysis:** Utilized Python for data analysis, EDA, and insights on worldwide living costs. Key skills: data preprocessing, visualizations, classification, and statistics.

Work Experience

2020-Present: Manager, Food Industry.

2015-2020: Shift Supervisor, Security Company.

Military service

2012-2015: Combat Medic, National Guard (Mishmar Hagvul), Jerusalem.

Volunteering

2020-2023: Volunteer work in 'Friends in old age' community. Assist elderly individuals by walking their dogs and providing essential support for their daily needs.

Languages

- Hebrew- Native.
- English- Fluent.
